PAYMENTS

Founded in 2005, Aliaswire has emerged as a leading provider of Payments Platform as a Service with partners and clients that include the largest banks, Fortune 500 companies, payment networks and everyone else in between.

2014-2016

Web Services and Incentive-based Payment Optimization

2014: Introduction of Payment Flow Controller to enable highly customized biller configuration.

2016: Transentives, patented, incentive-based transaction processing is introduced to merchants and billers.

2016: In partnership with a major payment network, PayVus will be launched enabling merchants to accept payments at a significantly reduced cost.

2012

Connectivity

Aliaswire's Platform as a Service is integrated with over 30 payment processors and networks.

Aliaswire is recognized as the fastest growing biller direct platform provider in the industry.

2009

Web Services and Least-Cost Routing

Introduces webservices to process high transaction volumes for enterprise billers and merchants, helping billers save on interchange rates.

2008

Recognition

Recognized as the fastest Biller Direct on-boarding solution in the industry by Aite. Leading financial institutions and processors sign multi-year agreements with Aliaswire to offer DirectBiller® for their commercial clients

2007

P2P, Push Payments and Prepaid

Introduced first mobile P2P service in the US.

First ever real time push payment in the US is executed through Aliaswire. Aliaswire enables Star, NYCE and Pulse Credit transactions commercially for the first time.

Launched PayVox, a mobile and natural voice based bill payment solution for prepaid issuers.

2006

Partners

Introduced DirectBiller®, the first distributed/rapid on-boarding Biller Direct platform, enabling channel partners with full control over implementation and support.

Key Operations Facts

- 99.99% Platform Uptime
- PCI DSS 3.0 Level 1
- HIPAA Compliant
- SSAE16 SOC Type II
- n+1 Data Center Redundancy
- True Platform as a Service (PaaS) Solution
- Experienced Management Team

Designed and built for channel partners, DirectBiller is the industry's premier electronic bill presentment/payment platform (EBPP) that offers a broad range and all sizes of businesses the ability to efficiently manage their accounts receivable process from invoicing through collection. The DirectBiller platform's intuitive functionality and robust Platform as a Service (PaaS) architecture lets end-customers pay via mobile, web, voice as well as live agents. Simple administrative interfaces enable businesses to quickly configure even the most complex payment workflow including the upload and management of invoices and bills, real-time and scheduled reporting, remittance processing and daily payment reconciliation. DirectBiller's extensive Web Services API also allows ISV's and VAR's to embed fast and secure credit, debit and ACH payment processing directly into existing systems.

DirectBillerEnterprise™

The solution for large billers that supports:

- Single Sign On and web services for integrations
- Secure Payment processing and bill presentment
- Patented Payment Flow Controller technology - create your own custom payment logic while using the DirectBiller platform

DirectBillerChannel™

Industry-leading channel partners solution:

- Empowers channel partners to manage all biller support and Payments services
- Fast time-to-market and unparalleled flexibility
- Complete implementations in days vs. weeks
- Dynamically allocate features to the service or add divisions in near real-time without service downtime

Aliaswire Transaction Service™

ATS is a payments Web Service API and provides:

- A complete suite of API's for Credit, Debit and ACH payment processing
- Full control of bill creation and management, Comprehensive transaction processing reporting and reconciliation that is ideal for large Billers and ISV's and VAR's

PAYMENT PROCESSING SERVICES WITH TRANSENTIVES™

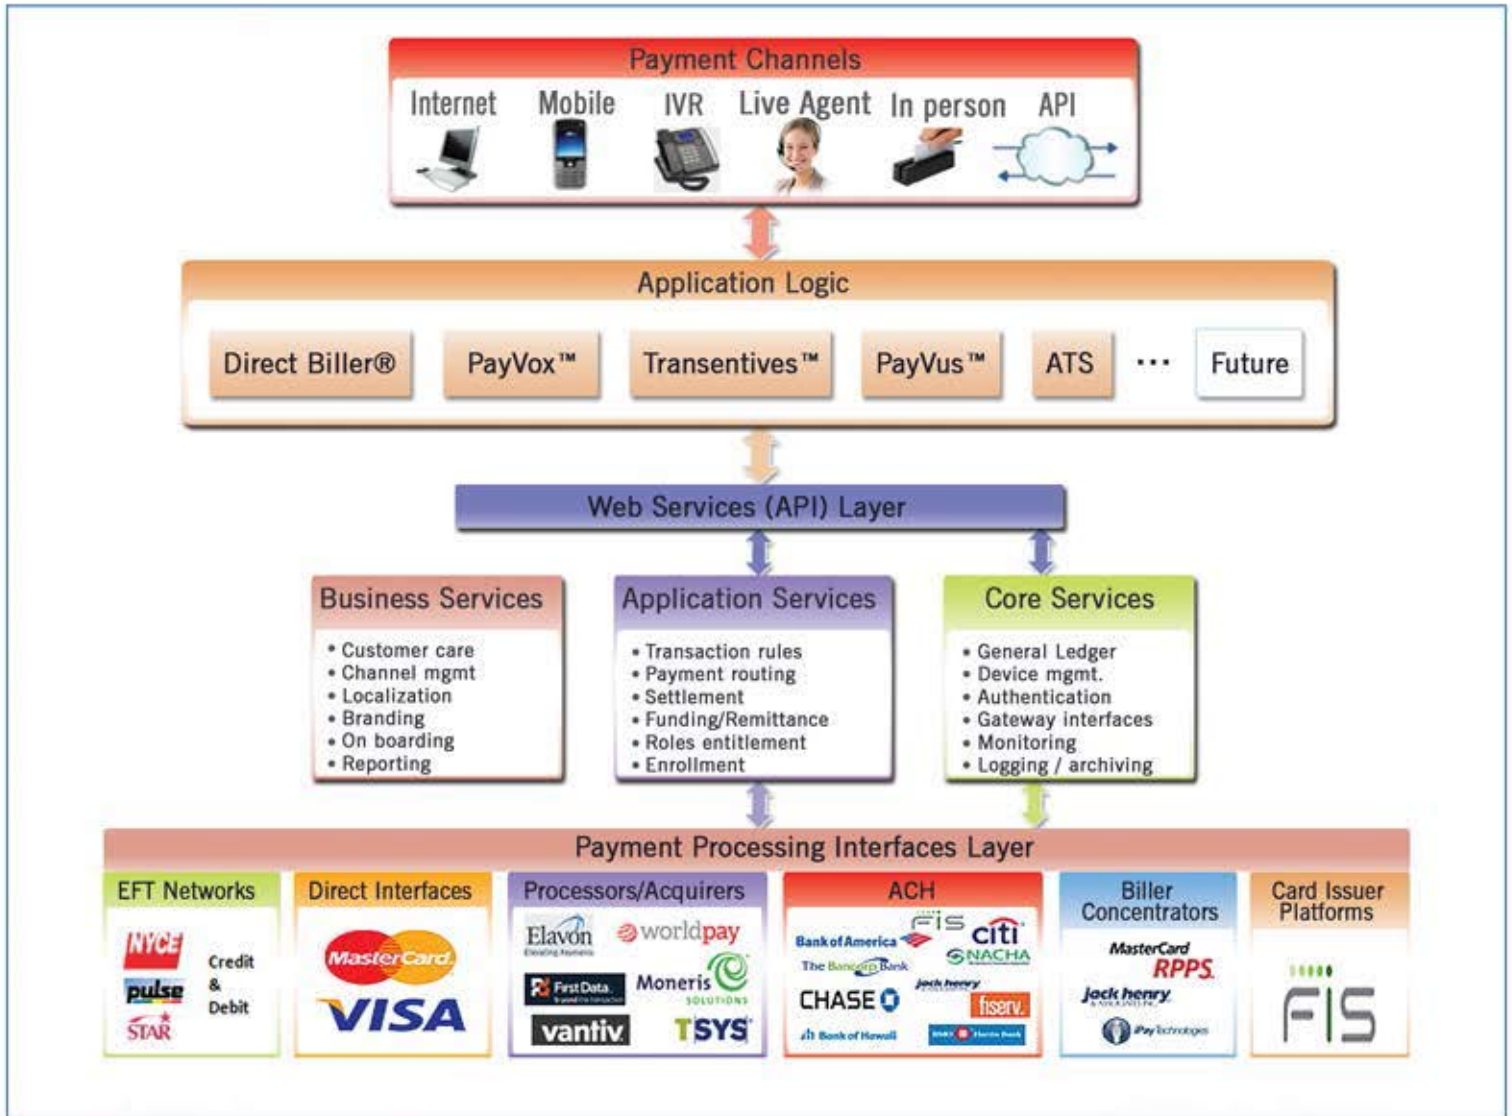

Transentives is Aliaswire's patented processing solution that enables merchants to reduce the cost of payment processing while providing an incentive to their customers.

Transentives calculates the full cost of the payment transaction at the point of checkout and evaluates lower cost payment alternatives in real-time.

Transentives is perfect for merchants with large ticket items, billers with recurring payments or convenience fee discounting.

Transentives flexible rules engine enables merchants to configure an offer to the customer based on the type of card used.

The Aliaswire transactions platform is the heart of Aliaswire’s payment processing solutions. As a Platform as a Service (PaaS), the Aliaswire transactions platform maintains a true multitenancy common core that supports even advanced clients’ needs, like multi-division support and custom functionality, from a single install base.
